## Tracing Uppercase W's

**Directions:** Trace each letter.

W W W W W

W W W W W

W W W W W

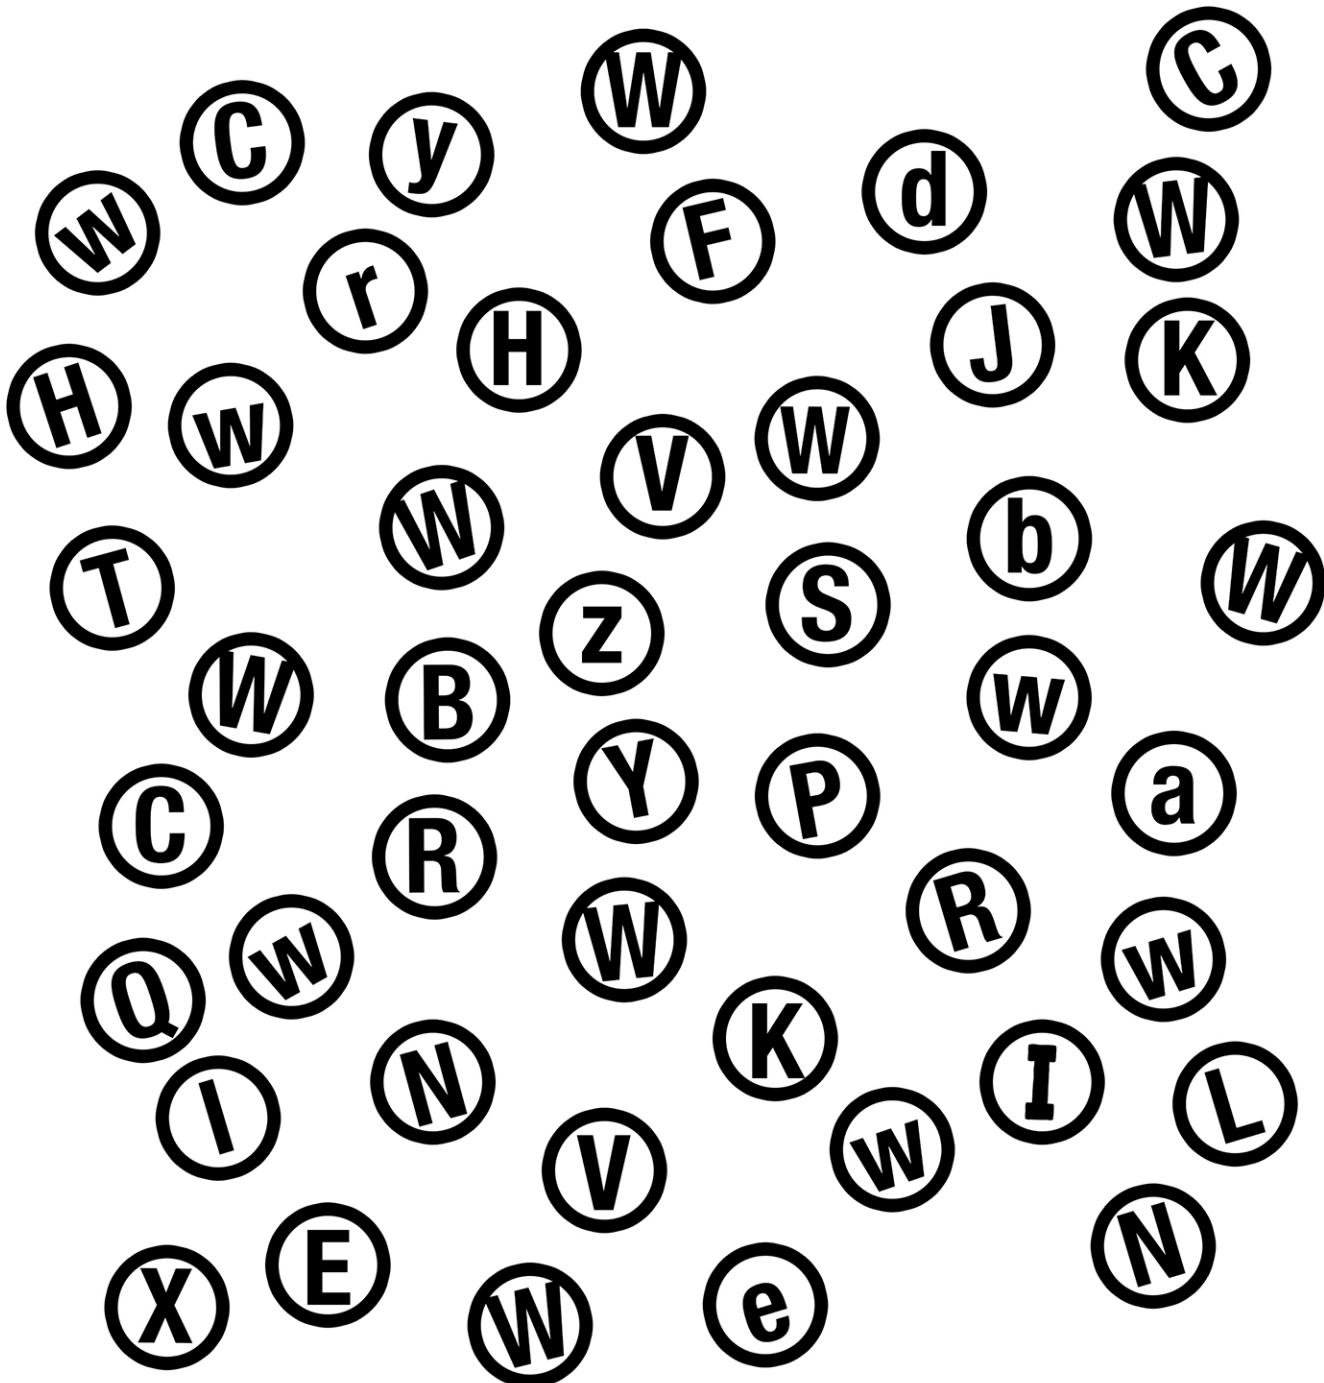

W W W W W

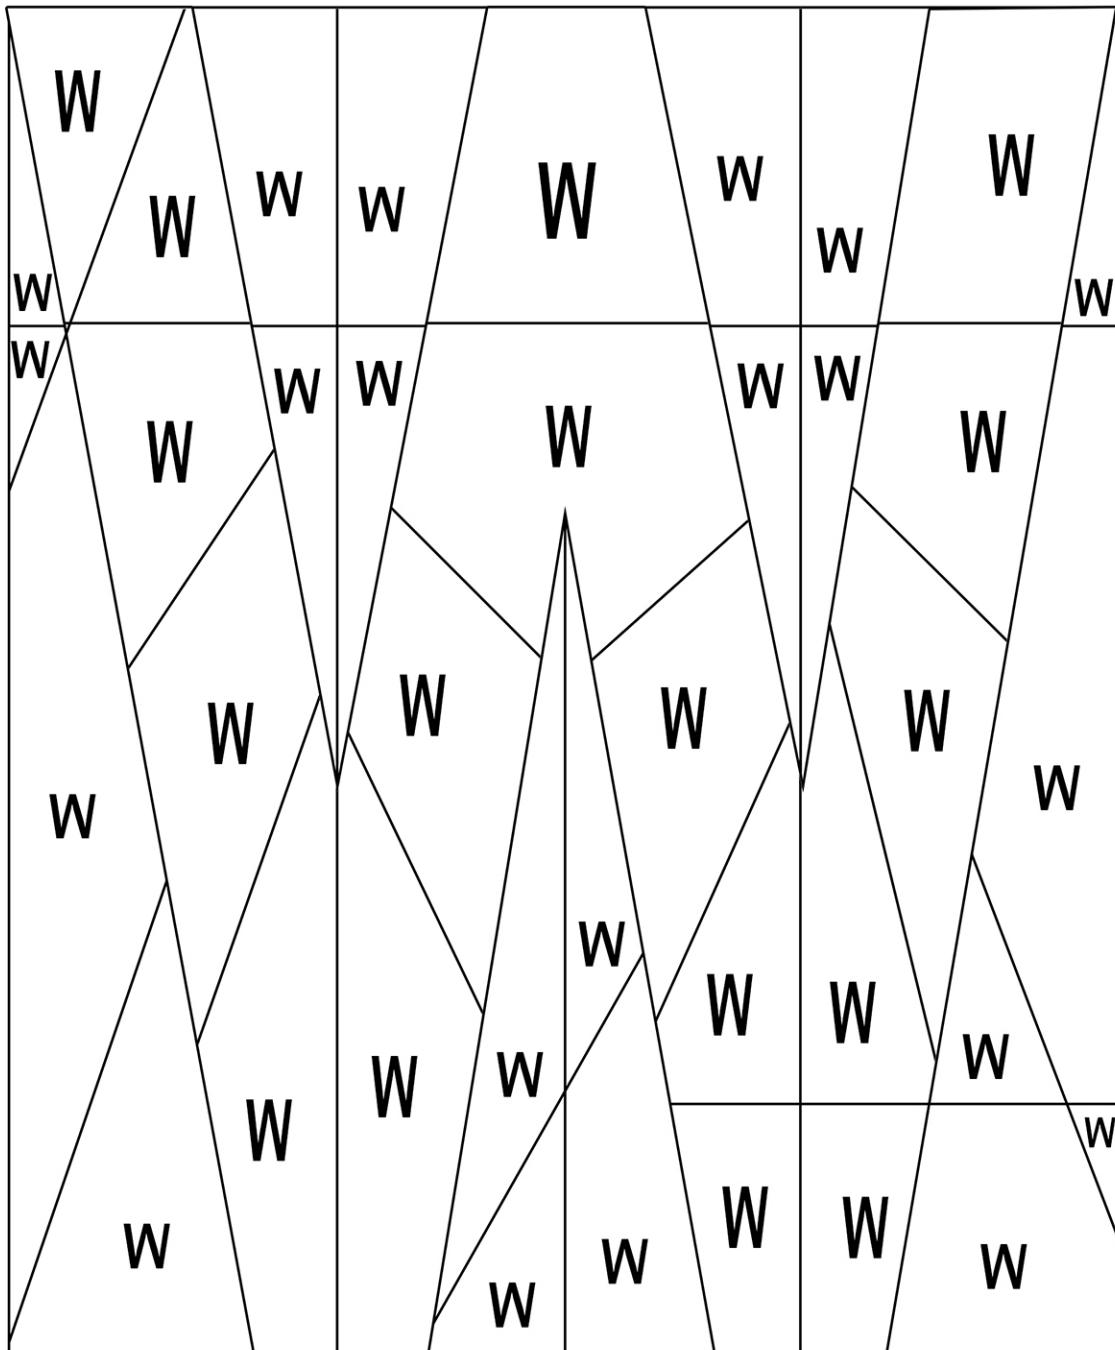

Name: \_\_\_\_\_

# Letter W

Please color all the circles with the Letter "W" in it.

Color the capital W's blue.

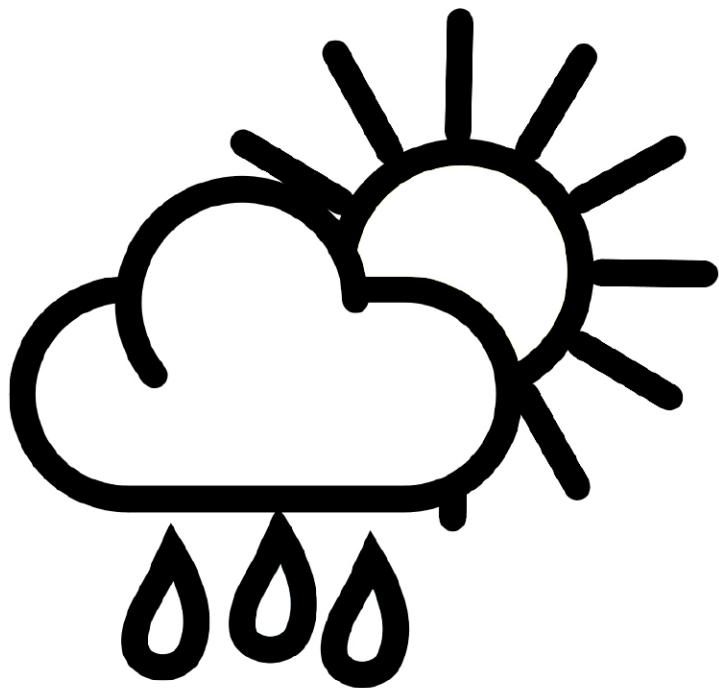

Color the lower case w's green.

Name: \_\_\_\_\_

## Color and Trace

**Directions:** Color the picture and trace the word.

weather

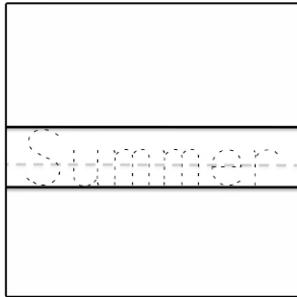

# Trace each season.

Winter

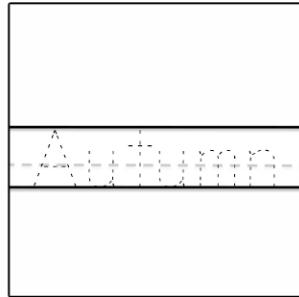

Summer

Spring

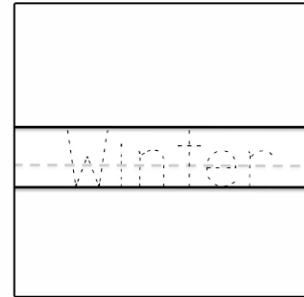

Autumn

Color 8

## HANDPRINT SUN

To make a handprint sun, first paint a paper plate yellow.

While your paper plate is drying, trace your hand several times on yellow and orange construction paper and cut the hands out.

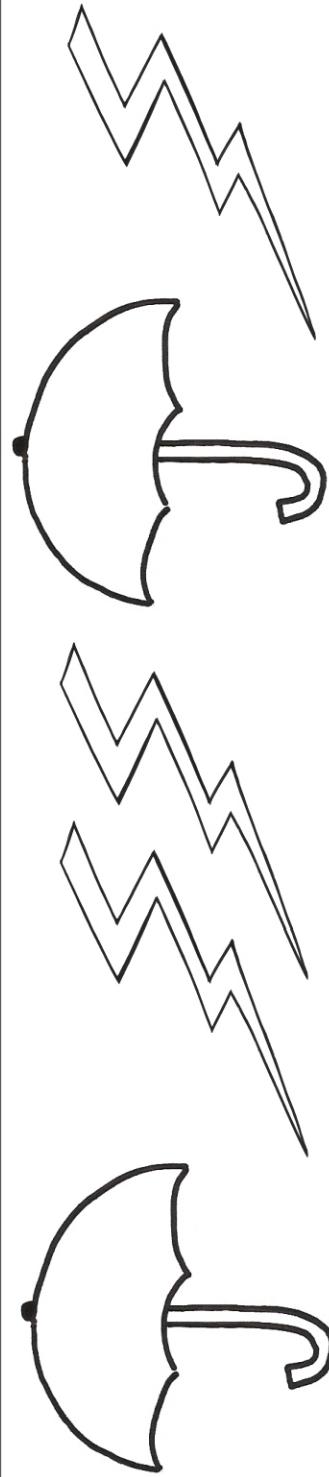

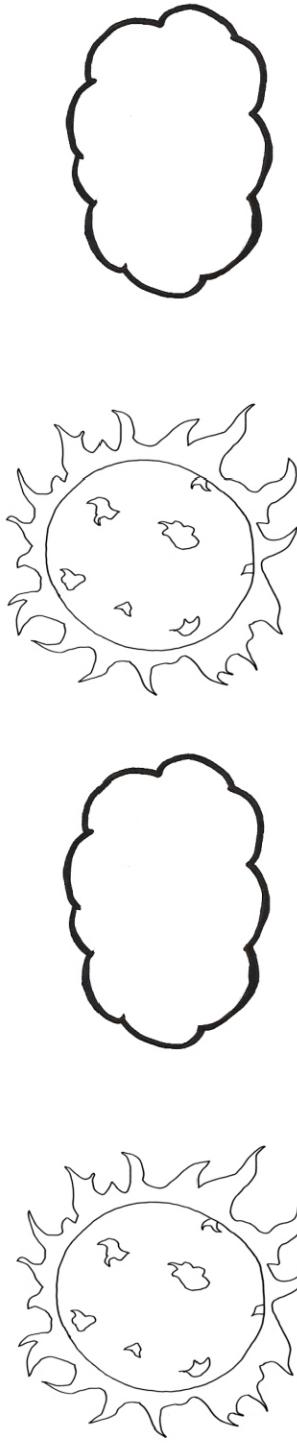

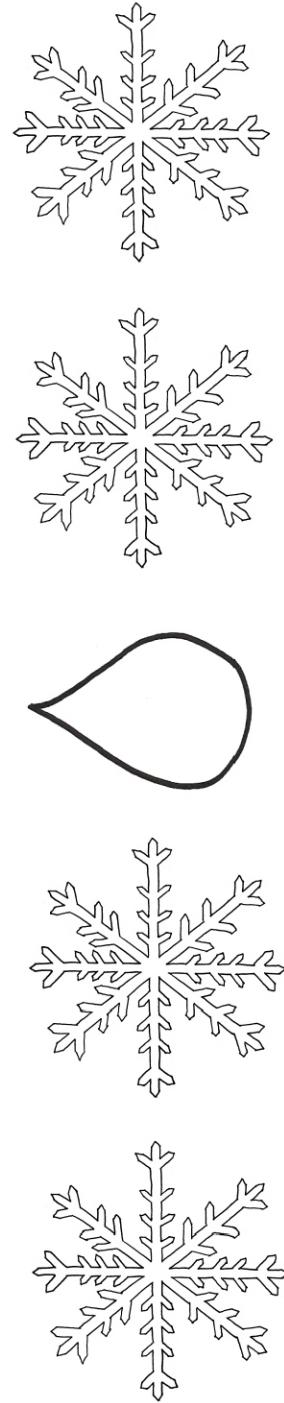

When your paper plate is dry, attach the hands to the back of the plate so that your fingers stick out from the sides.

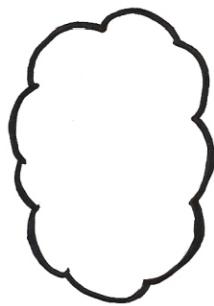

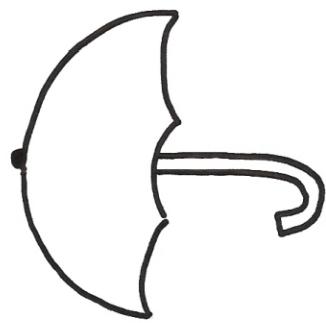

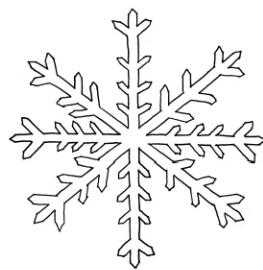

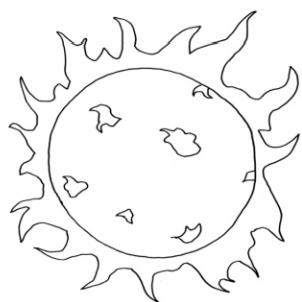

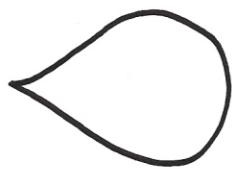

Your handprints have become the sun's rays!

# PATTERNS

Cut out the pictures on the next page and use them to complete the patterns below.

Copyright 2005-2010 by The Adventures of Scuba Jack, Inc., All rights reserved.

## RAIN CLOUD

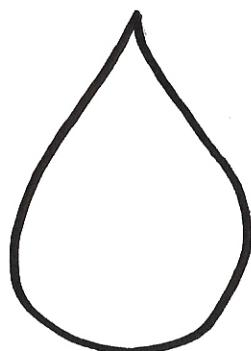

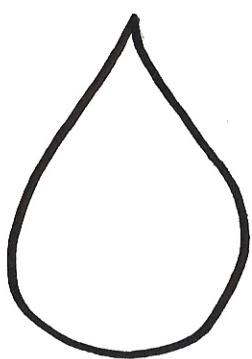

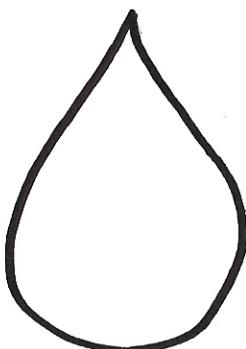

To make a rain cloud, cut out two of the attached cloud shape.

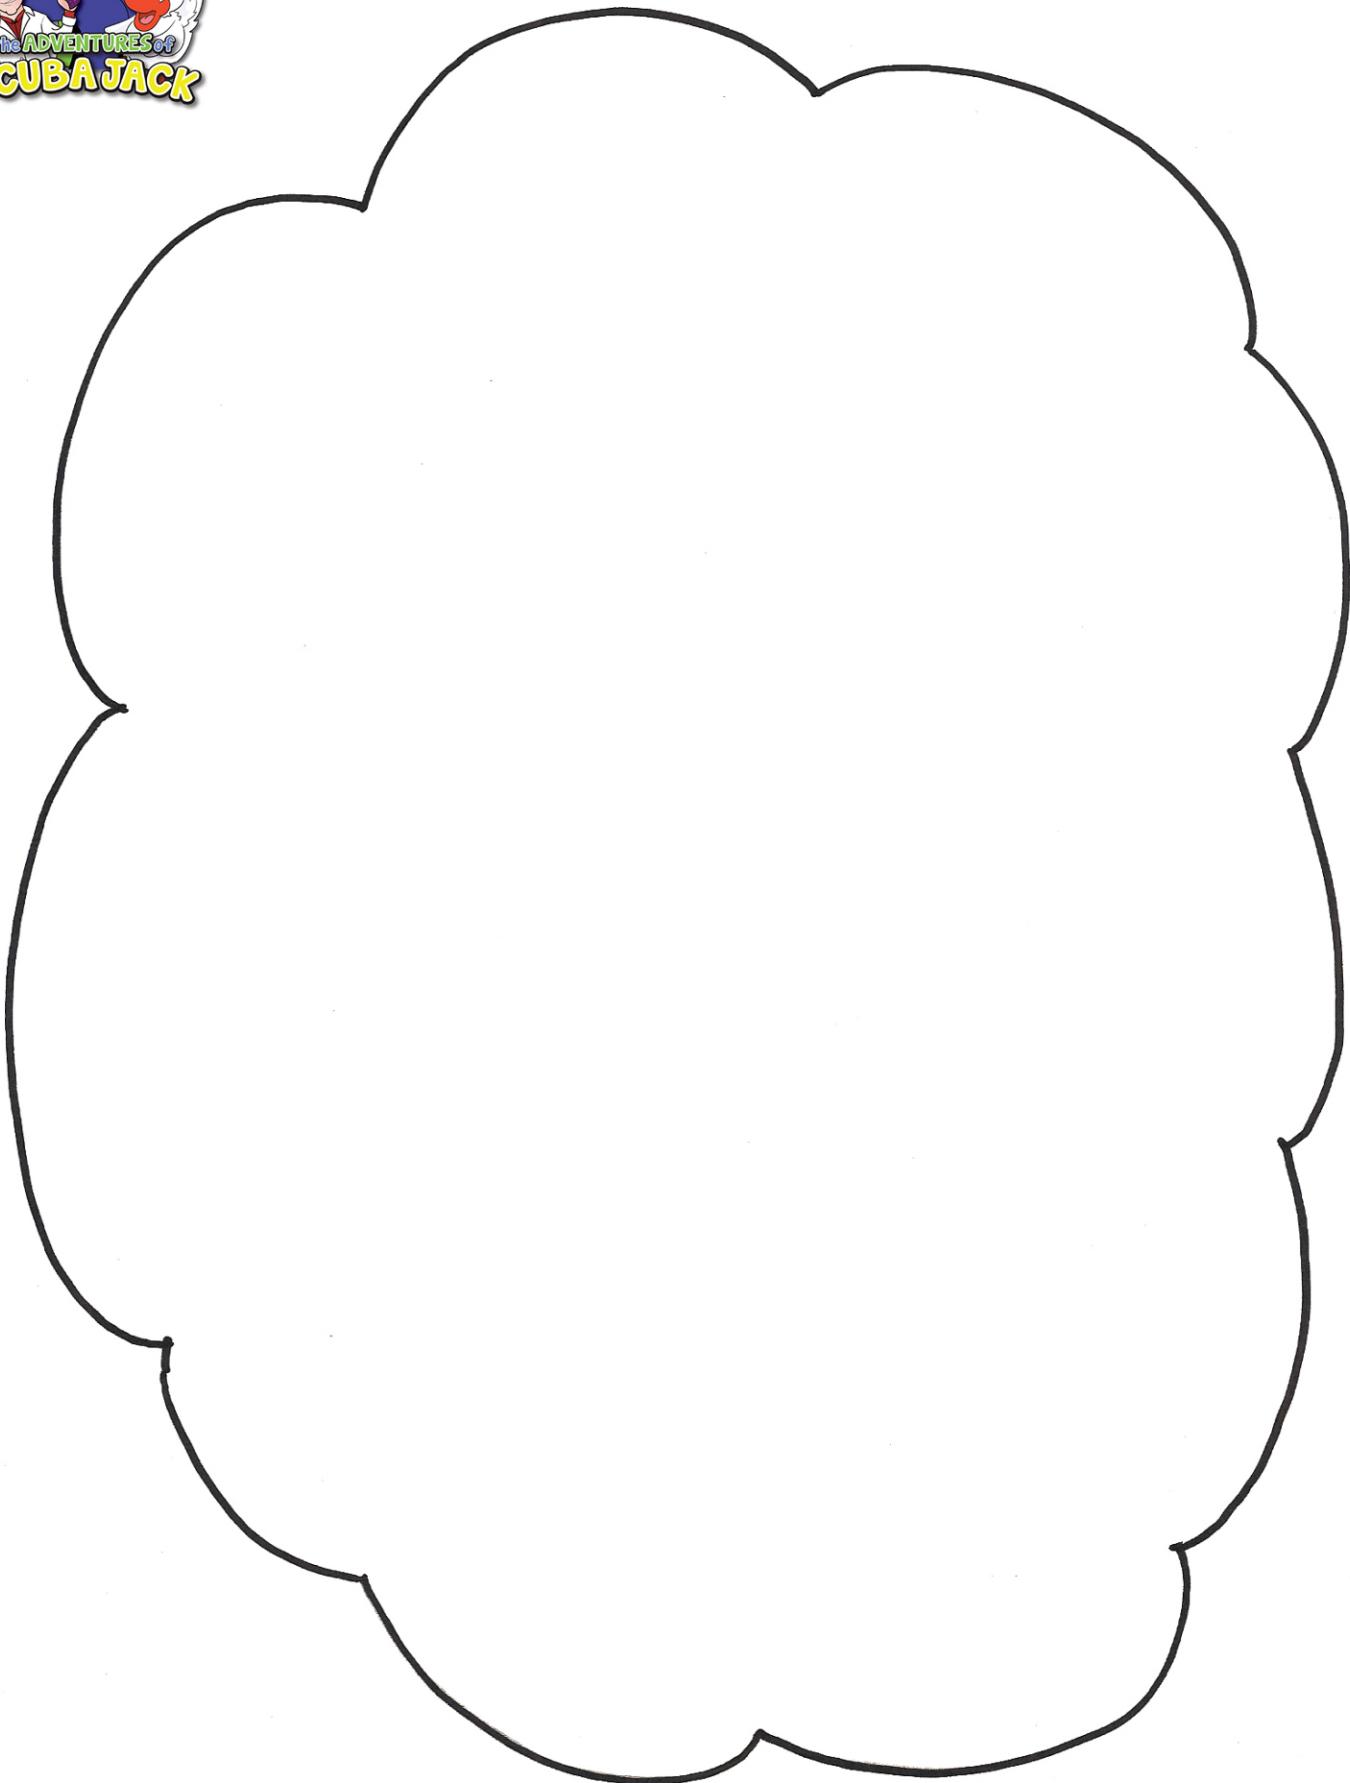

Put the two cloud shapes together and staple most of the way around. Leave enough space unstapled to stuff the cloud with shredded newspaper or tissue paper. Finish stapling after you have stuffed the cloud.

Cut three or four pieces of blue yarn that are different lengths. Attach the pieces of yarn to one edge of the cloud.

Next, cut out several rain drops from blue paper and glue them to the pieces of yarn.

When you hold up your cloud it will look like rain drops are falling from it.

# UMBRELLA

To make a colorful umbrella, first paint a round coffee filter with water colors and allow it to dry.

When the coffee filter is dry, spread glue on half of one side. Now fold the filter in half so that sticks together to make a half circle. This is the canopy part of your umbrella.

Choose a piece of colored paper to be your background. Try to avoid choosing blue.

Bend a pipe cleaner to look like a candy cane. This is the handle for your umbrella.

Glue the handle of the umbrella to your paper, with the curved part near the bottom of your paper.

Now glue the top of your umbrella to your paper so that it slightly overlaps the pipe cleaner.

Add rain drops to your picture. You can draw or paint them yourself, or you can cut out several from blue construction paper and glue them on.

# WEATHER WHEEL

To make this weather wheel, cut out the circles on the following pages.

Glue each circle to a paper plate.

Cut along the dotted line on the circle that says "Today's Weather Is..."

Put the two plates together so that one fits inside the other.

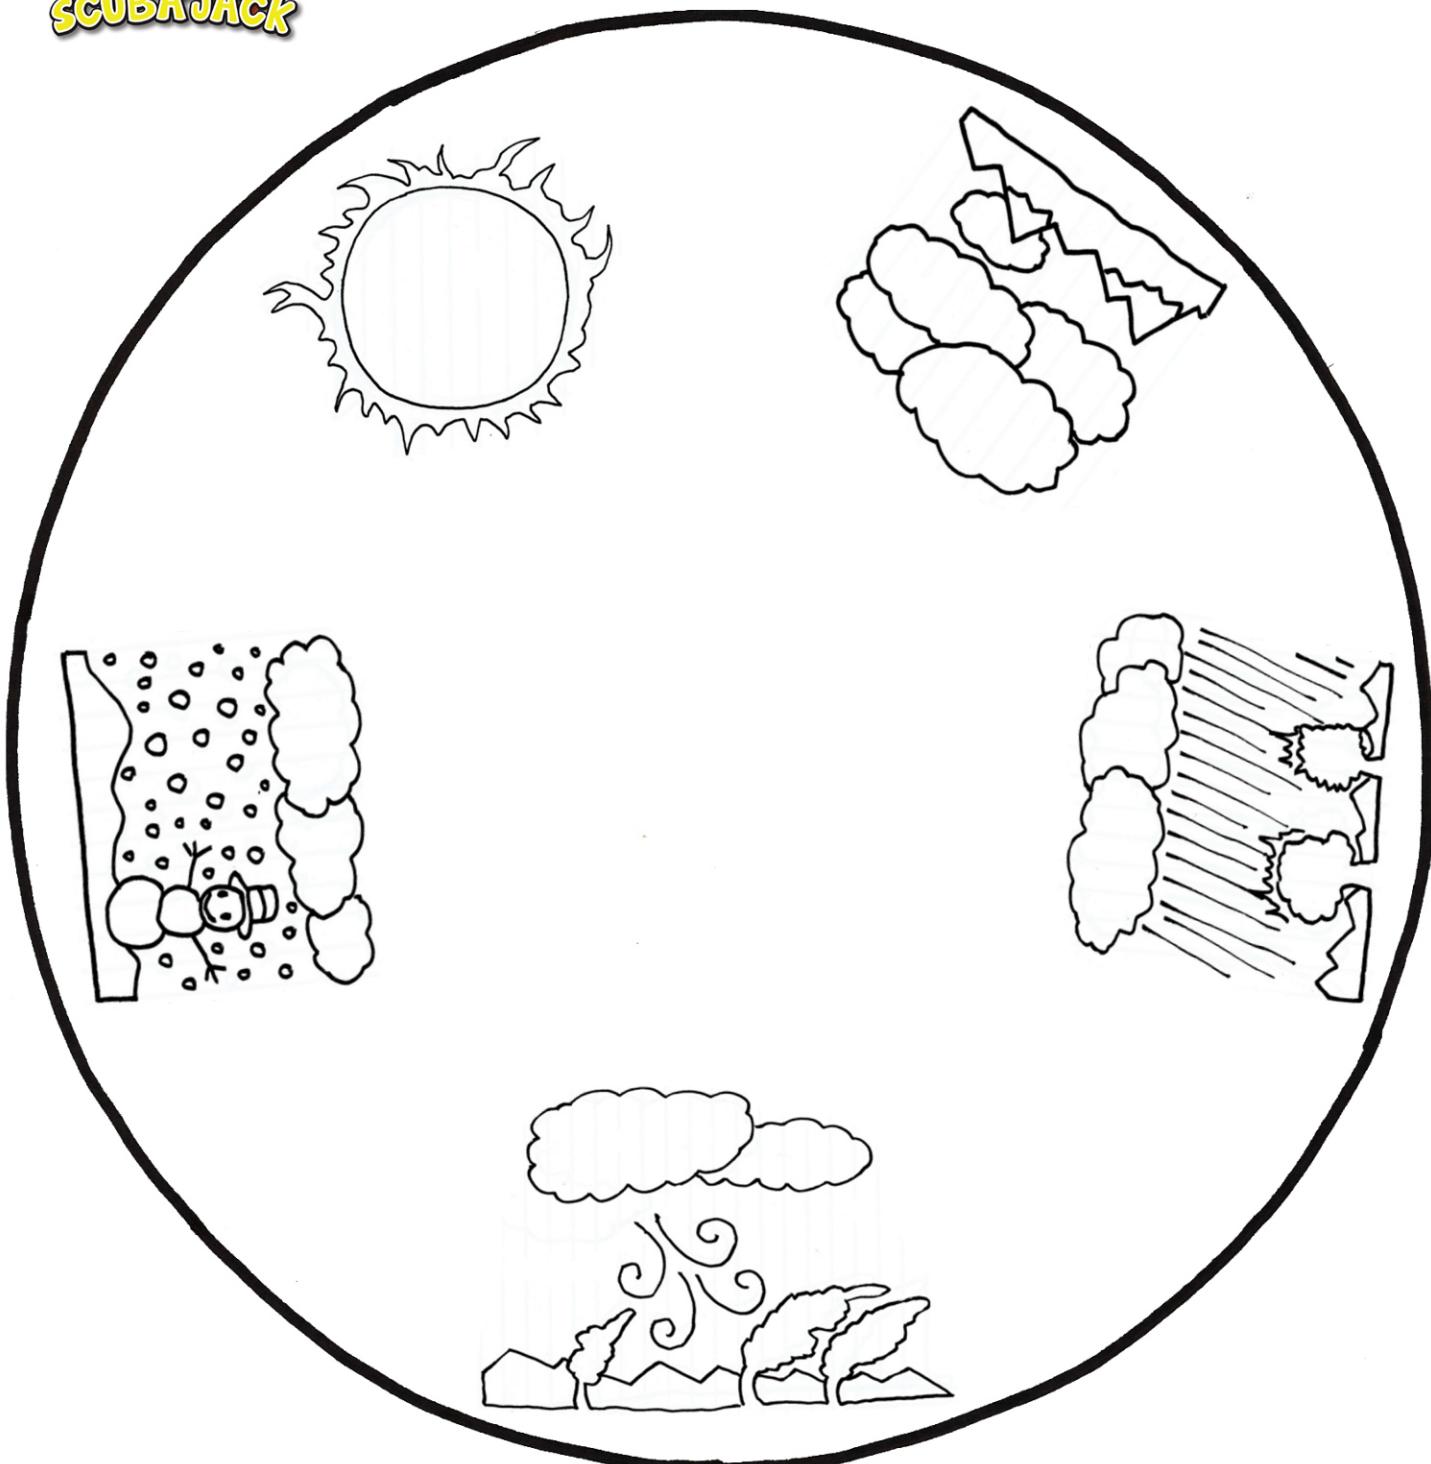

Using a pencil, poke a small hole in the center of the two plates. Push a brass fastener through the hole, and open the arms up on the back side of the plates.

The top plate should rotate so that you can show the day's weather through the hole that you cut out.

**TODAY'S  
WEATHER  
IS**

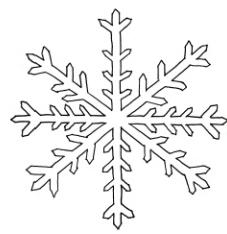

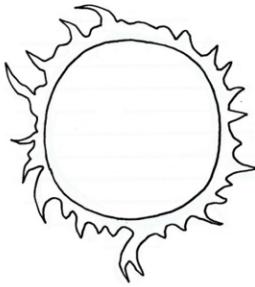

# WHAT SHOULD I WEAR?

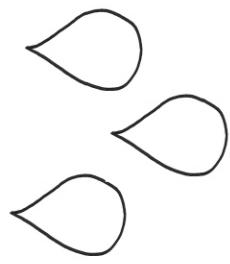

Cut out the outfits on the next page and glue them in the correct column.

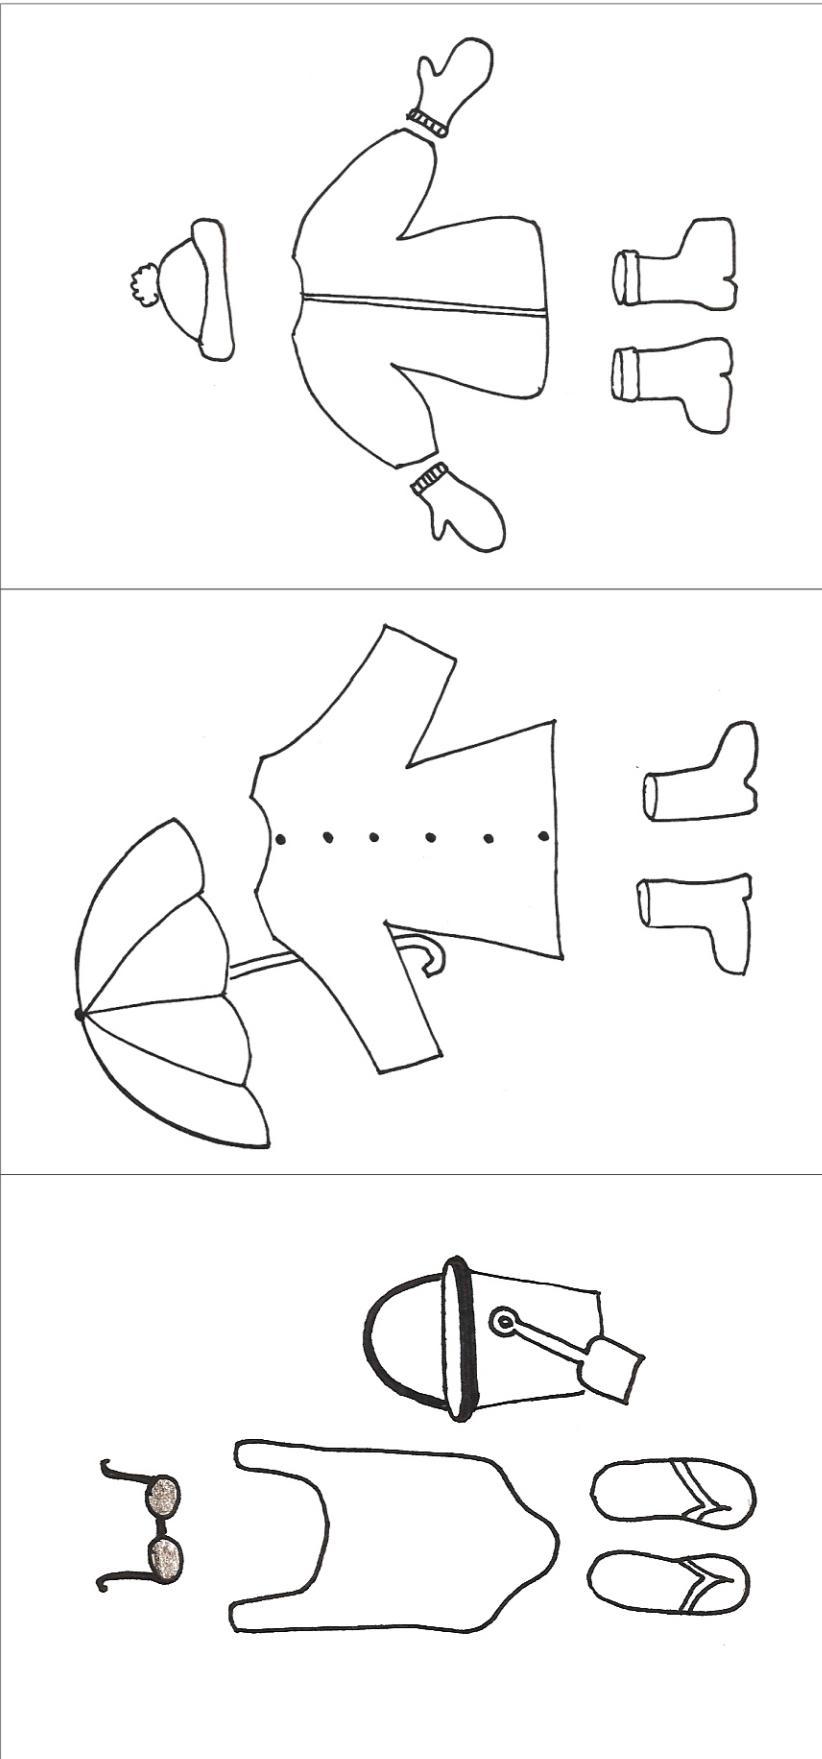

Today it is cold and snowy. I should wear.....

Today it is hot and sunny. I should wear....

Today it is rainy. I should wear...

**Match the weather to the correct words.**

**Windy**

**Sunny**

**Rainy**

**Cloudy**

Match the picture to each season.

**Spring**

**Autumn**

**Winter**

**Summer**

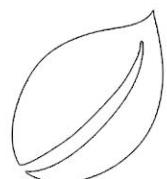

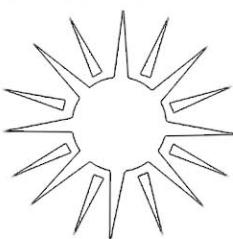

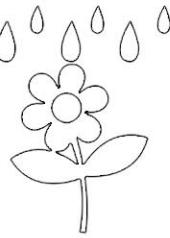

**Color and Cut out then Match the picture to each season.**

**Spring**

**Autumn**

**Winter**

**Summer**
